Dear Sir/Madam,

### Comments on the Section 16 Application No. A/NE-TK/752

The Conservancy Association (CA) OBJECTS to the captioned application.

#### **1. Not in line with the planning intention of Agriculture (AGR) zone**

According to the approved Ting Kok Outline Zoning Plan (OZP) No. S/NE-TK/19, the planning intention of AGR zone “*is intended primarily to retain and safeguard good quality agricultural land/farm/fish ponds for agricultural purposes. It is also intended to retain fallow arable land with good potential for rehabilitation for cultivation and other agricultural purposes.*”

However, all the proposed *Temporary Barbecue Site and Caravan Holiday Camp with ancillary facilities* are not related to agricultural purposes, especially land filling of 734m<sup>2</sup>. We cannot see any details to justify how such plan would fulfill the above planning intention.

#### **2. Adverse environmental impacts**

We worry that there would be several potential adverse environmental impacts caused by the application:

- No plans on land recovery: Various structures/uses, including 11 single-storey structures of about 2.8m to 5m in height, and 734m<sup>2</sup>-land filling for barbecue area, caravan holiday camp, refreshment kiosk, reception and storage of tools, washroom and changing room and rain shelter, would be temporarily proposed in

the application site. However, no details are available to illustrate how the land would be recovered after the proposed temporary use.

- Adverse sewage and waste impact: The applicant does not provide any details of sewage arrangement, such as design, collection, treatment, disposal of sewage, back-up plans, and so on. Besides, insufficient details are available to identify other sources of wastewater arising from operation, particularly potential oily wastewater from camping and barbecue site and how these pollution sources would be treated. We worry that if the above issues cannot be properly addressed, it may lead to serious environmental and hygiene problems within the application site and its surrounding area, which is active agriculture land, coastal protection area and Site of Special Scientific Interest.
- Other sources of environmental impacts not clearly addressed: There are no site management and operational plans to describe issues such as number of expected visitors/users, crowd control, waste management, additional provision of ancillary utilities, and so on. Regarding the proposed recreation activities rooms, no details are available to describe their exact uses and activities, and whether additional wastewater would be generated during operation. All these would help identify source of environmental impacts and then suggest measures to minimize or mitigate potential environmental disturbance, but we cannot see the project proponent has attempted to address this.

Yours faithfully,  
Chow Oi Chuen  
Campaign Officer
